Ms. Bunting & Ms. Takens

Math

This week marks the half way point through unit 1! We have worked with place value charts, rounding, and adding/subtracting multi-digit numbers. We will continue building on these skills with tape diagrams, word problems, and reviewing the standard algorithm. Try asking your student to round numbers or share how/when you round in your everyday life!

ELA

We are sticking with our focus genre, expository text! Go ahead and talk to your student about how people respond to natural disasters! Maybe even have them explain what a subject and predicate are!

Science / Social Studies

We are still in our first science unit: the birth of rocks! Through experiments, videos, and readings, we will learn all about rocks, volcanoes, and how the earth has changed over time.

Important Dates

- September 15th – Third meals start for eligible students
- October 17th – End of first marking period
- October 20th – Fall break, NO school
- October 22nd – Half day

Other Notes

- Please send in Title I Compacts (or email if you need a new copy).
